

Custom website Development

PROMATIC
SOFTWARE

Design and development of a custom website with the business or company branding, allows us to make ourselves known to our potential clients and, at the same time, demonstrate seriousness and commitment when offering our services or products.

What does it involve?

Designing a completely new website with the style that represents your business or company's industry.

A fully responsive website. This allows the site to be viewed on any device, including desktop computers, laptops, tablets, and smartphones.

Includes an SSL security certificate. It promotes customer trust.

Domain and web hosting setup

We provide hosting for storing the website on the Internet, as well as the requested domain.

Configuring the domain on the hosting server for managing business email accounts.

Support in generating and configuring email accounts

Assistance in the process of implementing email accounts. Stop using myname@yahoo.com or myname@gmail.com; offer trust to your clients and enhance your company's professionalism by using your own email accounts like myname@mycompany.com.

For more information, contact us at info@promaticsoft.com, through our website or via WhatsApp at +52 612 170 0956 . We will be happy to assist you.

Key Features

Responsive website using best practices.

Use of optimization tools for fast loading on any device.

Optimization of content and elements for proper indexing by search engines.

Optimization of visual material for fast downloading.

Creation of contact forms. Protection against spam.

Implementation of an SSL security certificate.

Domain and web hosting setup for your website.

Configuration of mail server for custom email addresses.

Support and basic training to update blog content without the need for a designer (applies only if the website has a blog section).

Integration with Google Analytics to track visit statistics.
